CATWOMAN

Halle Berry plays Catwoman brilliantly. She was the perfect person to play this character. I love her slinky outfit, especially the mask as it covers most of her face. The story line is excellent and the way Patience was transformed into cat woman is so magical but oddly believable. The first time I watched it I didn't know what was going to happen and it kept surprising me with all its twists and turns. Tom (a detective) and Patience's relationship is so ironic but, like many other parts, is so funny I was laughing all the way though. If you like cats, surprises, and adventures this is the film for you. For those of you who don't, you'll like it anyway!

OPHELIA POWERS (in Catwoman)

Ophelia Powers is an old lady and the owner of Midnight, the cat that gave Catwoman her powers. She is kind but slightly mad and although she is a key character in the film, she only appears in it twice. Ophelia lives in a funny little old-fashioned house in the middle of lots of new modern buildings in a part of the city. There are cats everywhere you look in her house and she has a library full of cat and catwoman books. She is quite an eccentric character and didn't give Patience any choice as to whether she wanted to be turned into Catwoman.

BLACK ICE

I really enjoyed Black Ice; I think there is a lot of mystery in it. I would've liked to see more adventure though. Jem was a good character and when she transforms into Crystal, I found it very magical! Firelix was a bit annoying at times but he is a likeable character. Shimmer was a very good villain but I preferred Shatter because she was over the top evil. I liked the way it was written because all ages could read it and

understand the plot and it could be an extremely good film. The author was great at describing the scenes, it made me feel like I was there watching it all happen. I really liked Jewel and Flicker so I wish they were in the story a lot more. I liked Jewel's personality and the whole idea of the main characters having magical pets. It was excellent!
