

SUSTAINABILITY AND PELICANS

- *Pelicans like tropical places around the world like India and Australia.*
- *The techniques of pelicans are amazing how they have a pouch, a pelican can hold 8 pounds of fish in their pouch and water they can hold 20 litres.*
- *A pelican weighs 3.4 kg .*
- *Its width 40cm - 50 cm, its wing span is 180cm long, pelicans are one of the largest birds to live it is 4 feet in height pelicans are 100-140cm long.*
- *Pelicans live to 15-25 years old .*

Emily and Danny are in Australia. Somebody rang them and told them that a pelican ate a piece of probably polyester fleece like a collar. "Can you help us get it out please as we don't want to do it ourselves. The pelican's ID number is 873650 202892". "Hey Emily what does this say 89443297640 WE FOUND THE PELICAN" Emily said "now we have to catch it" "LEAVE IT TO ME" Said Danny. They then decided to design a biodegradable fleece for outdoor sports so this wouldn't happen again.

THE END
