English - Finding Key Words

Give yourself five minutes to think of as many words linked to fashion and materials as possible.

Now discuss them with a family member – why are they linked to the topic? Use a dictionary/internet search to find more words and/or synonyms of the ones you already have. How many have you managed to find?

Put your words into different groups. This could be topic related eg. Fashion, brands and materials. Discuss why you put each word into that particular group. Now try to put them into groups related to the words. Eg. Word endings. Now try and group them according to word class (verb, noun, adjective, adverb etc.) Do they all have a group? Did many words move around? Which was the best way to group your words and why?

Use this as your word bank when doing any writing related to the topic.
