

# LITTLE CRUMBS

Our products are designed to allow children to create a world where they can explore their senses and connect with their imagination through a range of eco-conscious products.

We are big believers that children should end their day covered in mud and glitter. Our products are therefore designed to encourage the firefly chasing, cloud spotting, and puddle jumping child by embracing new adventures from the kitchen to the great outdoors.

We aim to reduce children's screen time whilst creating magical & wholesome moments for the whole family.
